MEMORANDUM FOR: Mr.
Mr.
Mr.

I believe we have found a good procedure for arriving at directed assignments in the upper grades of the Support Career Service and I suggest that we apply it to the selection of CT's for posts which result in family separations. The principal advantage is that it explains to the Career Service Management and to those selected for such posts the objective manner in which the selections are made. It may also save time.

Could we not, before any assignments are made, determine which posts are considered to be a hardship and fill these positions from among all available candidates by formal action and recommendations to DDS by the Panel? In this manner we would have no exclusions by prior commitment to non-hardship posts and I believe all concerned would be better satisfied. If you agree let's suggest this to DDS and work out the details with Mr. and others concerned.
